

## MONDAY

After a weekend event at the school, the tile and grout in the bathroom need to be cleaned. The Pivot, 3D Blue Tile & Grout Pad, and a little bit of water clean it all up!

SS P1428TGB - EBG-28 Pivot

## TUESDAY

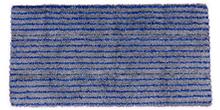

A small carpeted area in the office is showing some beverage spills. The Pivot, an encapsulating detergent, and the Microfiber Carpet Pad eliminate the spots and freshen up the carpet.

**Square Scrub Encapsulating Carpet Cleaner** - SS EBG-ECC

## WEDNESDAY

The finish on the VCT floor in the entrance to the school is showing some wear and needs to look good for a visit from the superintendent. The Pivot is used to quickly top scrub the floor so new finish can be applied!

**SQP Pad**

## FRIDAY

It is time to get the basketball court ready for the defending league champions! The Pivot is used to screen and prepare the gym floor for new finish. With a range of screen grits from 60 to 180, it is easy to follow the finish manufacturer's instructions!

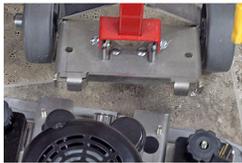

**Sandscreens**

EBG-20/C Pivot - 60 grit - 150 grit  
EBG-28 Pivot - 60 grit - 180 grit

## EBG-20/C PIVOT

**The Optional Two-Piece Handle For Pivots On The Go! -**

For Pivots that need to move from job site to job site, the optional two-piece handle is the way to go! With this option, the

Pivot breaks down into four pieces for transportation, allowing it to be transported in any car.

**The Perfect Balancing Act -**

The perfect balancing of our deck allows it to sit flat on the floor during operation, which leads to consistent abrasion and cleaning pattern, delivering superior

results, improving operator comfort, and extending the life of the pads!

**The only time something round should go into a square corner.**

It may have been a while since you took a math class in high school. If you are like us, you are still struggling to find the equation that allows you to clean a square corner with a round machine. The math just doesn't add up...

**"Made In America" To Support American Workers -**

Square Scrub products are proudly made in the heartland of America, Jonesboro, Arkansas! We purposefully source high-quality, American-made products for our machines, so you can be proud to know your purchase of a Square Scrub product supports American workers!

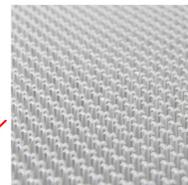

**Secondary Switches Are For Floor Machines -**

At Square Scrub, we designed our Pivot from the ground up to just be a Pivot. Since our unit is orbital, making it easier to operate and train on since the orbital motion does not swing the unit all over the place, you do not need a secondary switch for operation.

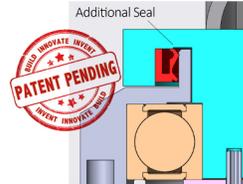

**Isolators Make The Pivot A Smooth Operator -**

Creating a great experience for the people who use our equipment is important for us, so we have worked hard on our isolator system. The handle of the Pivot is connected to the base with 10 isolators, greatly reducing felt vibration.

**Full Grip Face = Full Performance -**

The grip face that grabs the pads covers the entire area of the base plate on a Square Scrub Pivot. This does two things for you, it provides cleaning performance across the pad and it protects the grip face by eliminating areas where water and detergents could get behind the grip face.

**Protecting The Heart Of A Square Scrub Pivot -**

The heart of any orbital cleaning machine is the bearing assembly that drives the cleaning action. We have a patent-pending dual-seal system to protect our bearing assembly, which allows us to warranty it for 5 years.

**Take It All Off With The Pivot! -**

What do you get when you combine a perfectly balanced deck that sits flat on the floor with a full grip face delivering unparalleled cleaning performance? You get the ability to remove 5 coats of floor finish in 5 passes!
