

Use Wet

Use Dry

Can Use Chemical

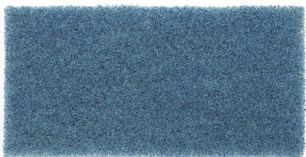

Use Driver Pad

### White Driver Pad SS PO511DRIVER

This 1/4 inch spacer or driver pad is used to protect the grip face when using abrasive pads. Place this pad between the grip face and the abrasive pad.

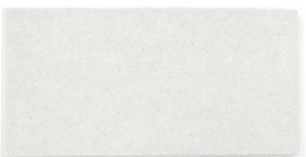

### Blue Driver Pad SS PO511BLU

This spacer or driver pad is used to protect the grip face when using abrasive pads. Can also be used for light cleaning.

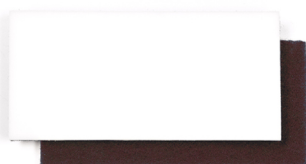

### Red Driver Pad SS PO511RED

This spacer or driver pad is used to protect the grip face when using abrasive pads. Can also be used for light cleaning. Less abrasive than the Blue Driver Pad.

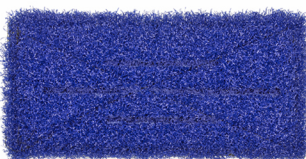

### White Pad SS PO511WHT

This pad is used for light cleaning, particularly on high-gloss surfaces.

### Xtract Pad SS PO511XTR

This is a melamine pad for removing scuff marks and cleaning rubber floors, gym floors, VCT, terrazzo, polished concrete and more.

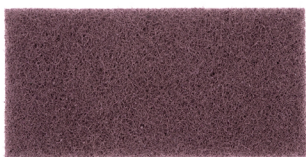

### Blue 3D Scrub Pad (Tile & Grout) SS PO511TGBV

This pad is used for any surface with depth and dimension such as tile & grout, LVT, concrete and rubberized flooring. Provides deep cleaning without being abrasive.

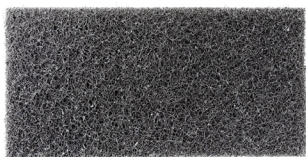

### SQP Pad SS PO511SQP

Thin, abrasive pad used in the dry floor finish removal process. (VCT) Always use in combination with the thin white driver pad to protect the grip face.

### SHO Pad SS PO511SHO

This is an abrasive pad used to remove floor finish when chemical stripping VCT floors.

### Titan Pad SS PO511TITAN

This pad has a high content of abrasive grit and has superior chemical resistance. More abrasive than our SHO pads, it is used to remove finish from VCT during the chemical stripping process.
