

**Before your first use:**

Please register your new Pivot at [www.squarescrub.com/warranty-registration](http://www.squarescrub.com/warranty-registration) to activate your warranty.

Place the squeegee assembly onto the rear axle. Connect the vacuum hose from the vacuum tank to the squeegee assembly.

Fill the solution tank with water or solution using a hose or bucket.

Plug the power cord into a grounded outlet.

Flip the switch on the circuit breaker to turn on power to the HydroVac Pro system.

Push lever forward to open the solution tank valve and apply solution to the floor.

Squeeze the trigger on the machine to activate the vacuum and floor machine motor. Push the machine forward to scrub the floor. The squeegee will lift up the dirty water behind the pad.

For storage, unhook the vacuum hose from the squeegee assembly. Hang the squeegee assembly from the tool holder. Store the Pivot on a driver pad in order to prevent grip face damage. **NOTE: ALWAYS EMPTY THE SOLUTION AND VACUUM TANKS BEFORE LOWERING THE MACHINE ON ITS BACK.**

The vacuum tank can be emptied via the tank drain at the bottom. To empty the solution tank, make sure the valve lever is in the closed position, lift the actuator off the valve, and then lift the solution tank up off the vacuum tank and dump.

**DO NOT REMOVE THIS LABEL**

Do not expose to rain. • Store indoors. • Disconnect power if machine is left unattended. • Plug into grounded outlets only. • Do not use an adapter or remove ground pin on plug. • Do not use if cord is damaged. • Disconnect power before servicing. • Electrical service must be performed by an authorized service station or electrician. • Use only non-flammable commercial chemicals intended for machine application. • Do not use where explosive vapors or dust are present in the air. • Do not allow machine to freeze.

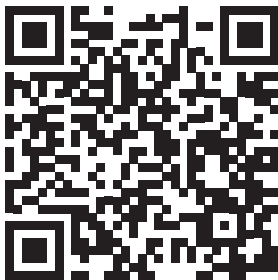

**WARNING:** 

Please note the below warning labels on your equipment:
